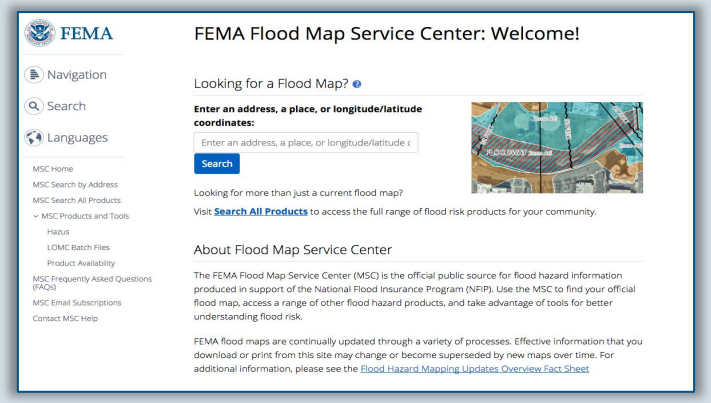
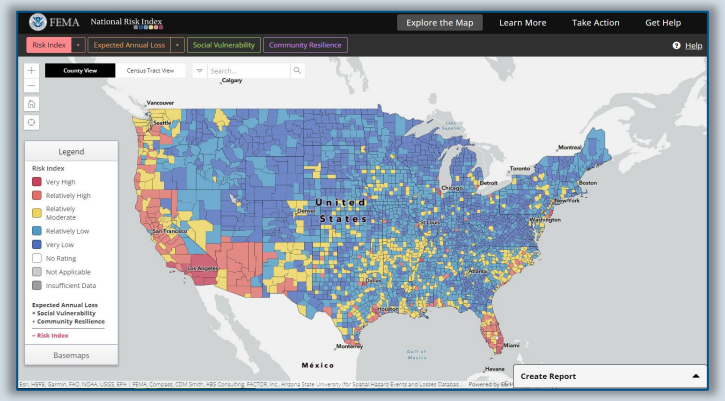
FEMA Data in Action



Flood Map Service Center

- The official public source for flood hazard and flood risk information produced in support of the National Flood Insurance Program.
- It can be used to find your official flood map, access a range of other flood hazard products, and take advantage of tools for better understanding flood risk.

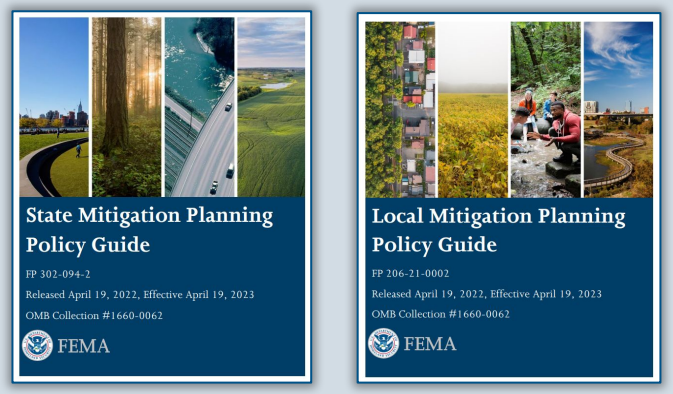
https://go.dhs.gov/Z56



National Risk Index

- This free online mapping application identifies communities at risk to natural hazards.
- Its comprehensive data incorporates:
  - Social vulnerability data
  - Physical vulnerability data
  - Future sea level rise

https://go.dhs.gov/Z58



State and Local Mitigation Planning Guides Updates

- Updates impact all 50 states, DC, and territories, and the more than 24,700 local governments with FEMA-approved mitigation plans.
- Updates require mitigation plans to include impacts of climate change and consider socially vulnerable and underserved communities.
